## Cyber suite product profile

### What's cyber liability and privacy protection, and who should buy it?

Cyber liability and privacy protection insurance is designed to address the exposures insureds face when using the internet, email, websites, computer programs and, in particular, from storing private information about their clients.

# What do we cover?

## Third party claims

From failure to keep data secure, including claims for compensation, investigations, payment of fines and penalties. We'll also pay defence costs and legal representation expenses.

## Business interruption

Reimbursement for lost income, as well as necessary expenses incurred to maintain operation of the business as a result of the interruption.

## Response costs

Reimbursement of the insured's own costs, including monitoring costs, post-event consulting costs, data restoration, notification costs, public relations costs, and legal representation expenses.

## Key automatic extensions

Cover is also available for botnetting and phreaking expenses plus cyber extortion demands. We also offer cover for court attendance costs and hardware repair or replacement costs.

## Social engineering and cyber fraud

Cover for social engineering and cyber fraud is also available as an optional extension, subject to underwriting criteria.

Refer to policy wording for a full description of cover available.

## Breach response team

When you purchase a cyber policy, what you're really buying is the expertise of the specialists who will assist you in the event of a claim.

We've partnered with the cyber incident management team (CIMT) to manage all cyber incidents from initial notification through to resolution. The CIMT are technical cyber insurance professionals who only handle the management of cyber incidents to ensure the best outcome for the insured.
